HARBORPARK
THE GOVERNMENTAL ACTORS:
A DIRECTORY OF RESPONSIBILITIES AND CONTACTS

Compiled by: Emel F. Hadzipasic,
Harborpark Planner

January, 1986

BOSTON
PUBLIC
LIBRARY

PREFACE

HARBORPARK, the City's planning and development program for Boston's waterfront, was initiated in October, 1984. The plan, covering an area of 2,100 acres in five neighborhoods abutting the Harbor - East Boston, Charlestown, North End/Downtown, South Boston, Dorchester - aims to achieve balanced development during the continued revitalization of waterfront properties. Harborpark's goals include expanding opportunities for public usage of the shoreline, ensuring that the benefits of economic growth are shared by all of Boston's residents, and encouraging public participation in the planning process.

This report, Harborpark - The Governmental Actors: A Directory of Responsibilities and Contacts, contains information (obtained through a mail survey) on the Boston Harbor-related roles, responsibilities, and projects of 8 federal, 23 state, and 20 local government entities. In addition, it identifies a contact person, address, and phone number for each entity. The report will assist Harborpark planning and implementation activities in two important ways. First, it will provide developers, government agencies, and the general public with a complete and centralized source of information on government entities which play a role in the development of Boston's waterfront. As such, it will facilitate communication among government staff undertaking related functions and others interested in various issues related to Boston Harbor. Second, the report will assist the Boston Redevelopment Authority in performing a coordinating function within this process. From the information contained within it, the Authority will develop and make available to the public, charts outlining the review procedures for development proposed on the waterfront. These charts will clarify the relative powers and responsibilities of the various agencies and provide guidance in meeting the requirements of the development approval process.

The information contained in the report will be updated periodically in order that the document maintain its usefulness throughout the Harborpark planning and implementation process. However, since regulations controlling waterfront activity are in a constant state of change, anyone involved in a development project or study is advised to consult the agency itself for current regulations and procedures.

SECTION I
LOCAL GOVERNMENT

AGENCY

Boston Housing Authority (BHA)

ADDRESS

Boston Housing Authority
52 Chauncy Street/3rd Floor
Boston, MA

CONTACT PERSON(S)/PHONE NO.

Doris Bunte, Director
Elizabeth March, Redevelopment Director
(617) 451-1250

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Owns Columbia Point Housing Project.
- o Submission of application for Chapter 91 License in connection with the revitalization of Columbia Point into a 1,400-unit mixed-income residential development - Harbor Point.
- o Provides low rent housing for low-income families and for elderly people of limited income.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

Harbor Point

The development will include a mixture of private rental housing with a distribution of 400 low-income and 1,000 market and moderate rate housing units in both new and renovated buildings.

The proposed site plan calls for expanded views of the water by establishing a consistent and orderly diagonal street layout. The creation of a new town green will link the recreational space along the waterfront to the residential area, creating a main street for the development. The main vehicular entry to the site, along the mall, will allow for a public connection from Mt. Vernon Street to the waterfront and throughout the project. Buses will provide public access to the site via the MBTA Red Line.

Open space distribution will reinforce the proposed street and neighborhood pattern of the development. As in the old New England Village, there will be a tree-lined, central "town green" with housing and community facilities on either side. But unique to the site, this green will lead to a waterside park filled with passive recreational facilities.

The redesign of the project will permit residents and the public expanded visual accessibility of Dorchester Bay and the Boston skyline from Columbia Point, JFK Library and South Boston. The proposed improvements will

enhance public accessibility to the waterfront area by opening up the project to neighboring communities and eliminating the fear of crime and vandalism, caused in part by the concealed design of the streets and buildings at Columbia Point.

The BHA will retain ownership of the land. BHA will convey the present improvements to the developers and enter into a ground lease for 99 years.

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

As the planning and development agency of the City of Boston:

- o Responsible for managing the development and implementation of the Harborpark plan.
- o Undertakes planning studies and formulates, with the participation of the Harborpark Advisory Committee and the public, development guidelines and plans.
- o Monitors implementation of planning projects.
- o Reviews and approves projects for residential, commercial, industrial, institutional, and recreational uses.
- o Provides recommendations to the Zoning Commission for the establishment of Interim Planning Overlay Districts (IPOD) and the issuance of IPOD Permits.
- o Provides recommendations to the Zoning Commission on amendments to the Zoning Code.
- o Provides recommendations to the Zoning Board of Appeal on applications for Conditional Use Permits and Zoning Variances.
- o Reviews and approves applications for Planned Development Areas (PDA).

- o Reviews and approves applications for 121A financing.
- o Acquires/leases/sells real estate for purposes of land assembly and redevelopment.
- o Reviews and provides comments to the Executive Office of Environmental Affairs on Environmental Notification Forms and Environmental Impact Reports/Statements.
- o Constructs, relocates, repairs public ways and sidewalks in the public interest.
- o Plans and constructs parks, playgrounds, and other public improvements.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

1. Area-Wide Activities

- o Establishment of Interim Design Standards for Harborpark neighborhoods.
- o Publication of Neighborhood Profiles for Harborpark neighborhoods.
- o Economic analyses determining most appropriate uses for waterfront land.
- o Provision of technical assistance to the Harborpark Advisory Committee.
- o Development of a public awareness program for Harborpark.
- o Undertaking zoning studies for waterfront areas and possible re-zoning.
- o Planning and implementation of Harborwalk.
- o Planning and implementation of water transportation network in the Boston Harbor.
- o Review of proposed development projects.

2. Neighborhood Activities

East Boston - East Boston Harborside, Lobstermen's Cooperative/Park, Harbor Landing, Old Boston East.

Charlestown - Schrafft's Center, Charlestown Navy Yard, Charlestown Shipyard Park, Rapids Furniture Warehouse .

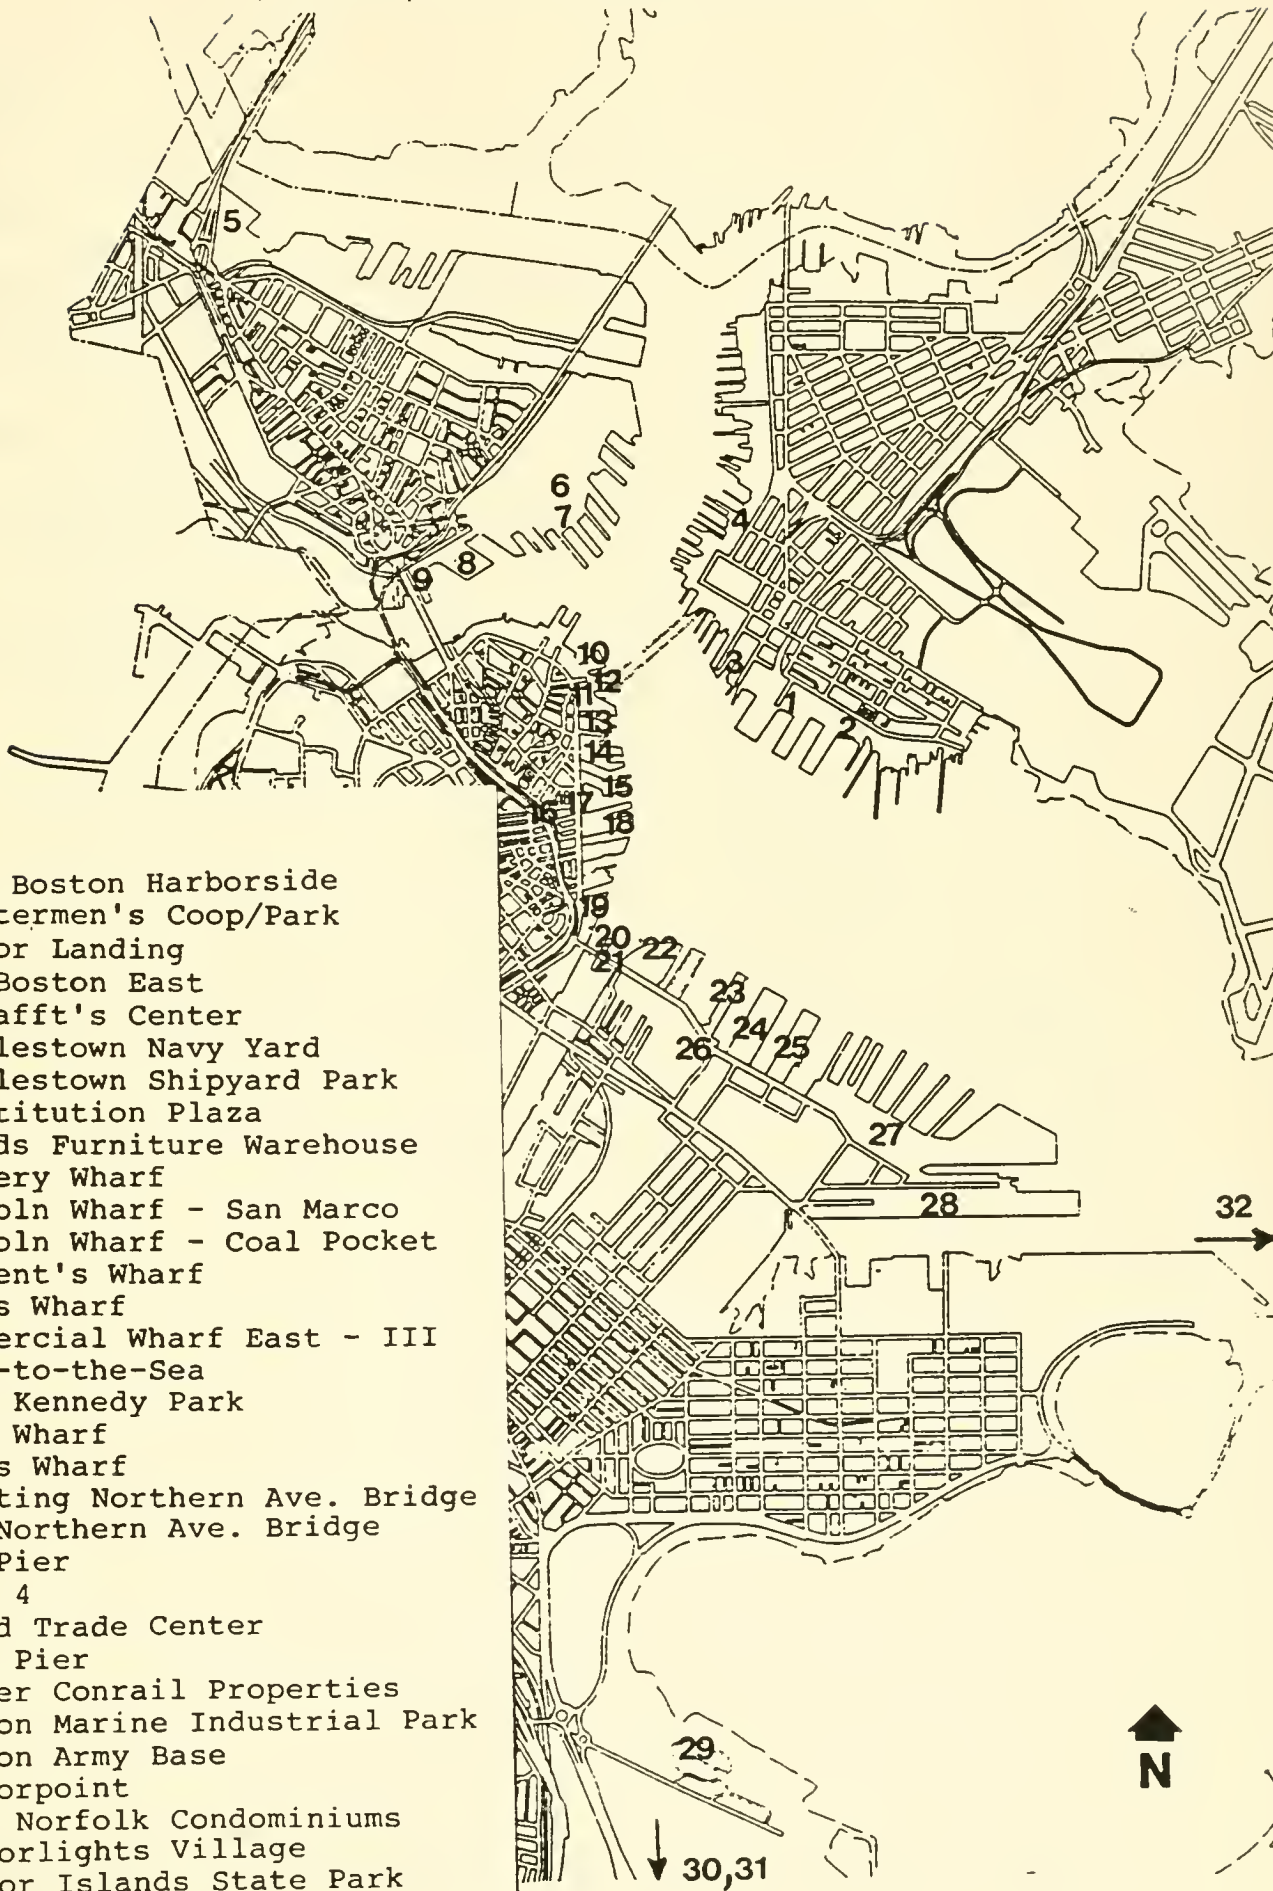

North End/Downtown - Battery Wharf, Lincoln Wharf - San Marco, Lincoln Wharf - Coal Pocket, Sargent's Wharf, Lewis Wharf, Commercial Wharf East-III, Walk-to-the-Sea, Rose Kennedy Park, Long Wharf, Rowes Wharf, Existing Northern Avenue Bridge, New Northern Avenue Bridge.

South Boston - Fan Pier, Pier 4, World Trade Center, Former Conrail Properties, Fort Point Channel Bridges, Fort Point Channel Planning Study.

Dorchester - Harborpoint, Port Norfolk Condominiums, Harborlights Village.

(See Harborpark Newsletters for details).

CONTACT PERSON(S)/PHONE NO.

Marilyn Swartz Lloyd, Director
Douglas R. Herberich, Director of Development
(617) 725-3342

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Oversees development of Boston Marine Industrial Park and Boston Army Base in South Boston and development on Upper Reserve Channel.
- o Promotes industrial growth and thereby expands industrial employment.
- o Acquires and develops land for industrial use.
- o Applies for and accepts grants, loans, or contributions in aid of economic development projects.
- o Issues revenue bonds for economic development projects.
- o Subject to approval of City Council and Mayor, designates areas of the City as Economic Development Areas.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

1. Bronstein Industrial Center

Rehabilitation of three of six sections (825,000 s.f.) of Building 114 at the former Boston Army Base for light manufacturing and industrial use. Construction completed in December, 1983. Currently 65% leased.

Project Cost: approximately \$14 million

Permanent Jobs Created/Retained: approximately 1,000

2. Boston Design Center

Rehabilitation of two sections (550,000 s.f.) of Building 114 at the former Boston Army Base as a center for the furniture and furnishings industry. Currently under construction. Anticipated completion date is November 1, 1985.

Project Cost: approximately \$30 million

Permanent Jobs Created/Retained: approximately 1,000

3. John Nagle Company

Renovation of Building 53 (130,000 s.f.) at the Boston Marine Industrial Park for use by fish company and two subtenants. Subtenants are Balco Engineering (HVAC systems) and C.J. Muldoon (metal welding). Currently under construction. Anticipated completion date is August 1, 1985.

Project Cost: approximately \$2 million

Permanent Jobs Created/Retained: approximately 500

4. Coastal Cement Corporation

Construction of a bulk cement storage, distribution, and packaging terminal at the eastern end of the former Boston Army Base. Anticipated construction start date is April 1, 1985; completion date December 31, 1985.

Project Cost: approximately \$10 million

Permanent Jobs Created/Retained: approximately 20

5. Harbor Gateway

Construction of roadway and traffic improvements and creation of a new 5-acre development parcel for light manufacturing/industrial use at the Summer Street entrance to the Boston Marine Industrial Park. Design of roadway improvements underway; construction funds applied for. Proposals under review for development parcel. Anticipated completion date is June, 1986.

Project Cost: Roadway/Traffic Improvements - \$3 million (public)
New Construction - \$5-7 million (private)

Permanent Jobs Created/Retained: 500+

6. Drydock Park

Construction of new waterfront park adjacent to Pier 10 at the Boston Marine Industrial Park and a safety/security fence around Drydock #3. Waterfront Park to be constructed by Coastal Cement Corp. (see above). CZM funding conditionally awarded for security fence. Anticipated completion date is December 31, 1985.

Project Cost: Waterfront Park - approximately \$150,000
Fence - approximately \$50,000

AGENCY

Environment Department

ADDRESS

Environment Department
City of Boston
One City Hall Square
Boston, MA 02201

CONTACT PERSON(S)/PHONE NO.

Lorraine Downey, Director of Environment Department and Chairperson of the Harborpark Advisory Committee
(617) 725-3850

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

The Environment Department is made up of six Commissions:

1. Boston Landmarks Commission (see separate survey).
2. Boston Conservation Commission (see separate survey).
3. Boston Art Commission - Since 1890, the Boston Art Commission has been curator of city-owned public art, responsible for its acquisition, siting, maintenance and interpretation. The Commission reviews and approves all acquisitions of public art works, such as statues, paintings, sculptures, fountains and plaques. To groups and individuals planning or offering art for public places in Boston, the Commission provides technical assistance at all stages of the process and approves the final design and siting. The Commission sponsors regional competitions for proposed works of art, such as the James Michael Curley Memorial in Dock Square. The Commission is working to establish a program of regular maintenance for public art, using both public and private resources, and encourages private restoration efforts.
4. The Air Pollution Control Commission is responsible for enforcing city and state air and noise pollution regulations and for administering the City of Boston's freeze on new parking spaces in the central city. The parking freeze, intended to reduce automobile emissions and encourage use of public transit, require that the Commission hold quarterly hearings to review applications for any new public parking facilities or expansion of existing facilities within the freeze area. The Commission either approves or disapproves an application, or determines that the new spaces are exempt from the freeze. Residential parking, for example, is exempt.

The Commission also issues permits for abrasive blasting of buildings and for open burning within the city; no such activity may take place without prior approval from the Commission. Violations of Commission regulations are subject to civil and criminal penalties.

5. Back Bay Architectural Commission - Does not operate in the Harborpark area.
6. Beacon Hill Architectural Commission - Does not operate in the Harborpark area.

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

The Boston Landmarks Commission is the city's historic preservation agency, created in 1975 to cover a wide range of activities directed toward protecting Boston's unique built environment.

The Commission is responsible under state law for:

- o architectural surveys of all the city's neighborhoods, relating each community's history as recorded by its buildings;
- o public education on architecture and historic preservation, including publications and exhibitions such as "Place Over Time" at the Museum of Transportation; and
- o designation of landmarks and several categories of historic districts within the city, through a process involving the preparation of technical study reports and public hearings. The result is a review process for changes to designated properties within limits set at the time of designation.

Any ten Boston voters may petition the Commission to designate a landmark, landmark district, architectural conservation district or protection area.

The Commission provides planning and administrative services to Historic Boston, Inc., a preservation revolving fund which assists with the equity financing of critical preservation development projects. The Commission also works closely with the National Trust for Historic Preservation and with the Massachusetts Historical Commission, the state agency responsible for listings in the National Register of Historic Places.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

National Register of Historic Places: federal list of the Nation's cultural resources worthy of preservation. Boston Landmarks Commission has on file copies of nominations forms (includes data on description and historic significance) for listed properties, and varying levels of information for potential properties.

Richard Dimino, Commissioner of Transportation Department and
Member of the Harborpark Advisory Committee
(617) 725-3073/4489

Susan Sloan-Rossiter, Unit Manager of Transportation Planning
(617) 725-3076

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Adopts, amends, alters and repeals rules and regulations relative to movement and parking of vehicular street traffic.
- o Erects and maintains traffic signs, signals and other devices for control of traffic in the City.
- o Informs public on rules and regulations adopted by the Commission.
- o In conjunction with other City departments, is currently formulating a water transportation policy for the City of Boston.
- o Issues permits for street occupancy, street opening (construction) and parades.
- o Regulates, reviews and enforces curbside usage, such as loading zones, meters, and handicapped parking spaces.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

1. Participate in planning process via Harborpark Advisory Committee - Status: Ongoing.
2. Develop transportation component of Harborpark plan in coordination with BRA - Status: Ongoing.
3. Member of Rows Wharf Advisory Committee - Status: Ongoing.
4. Member of MDPW Water Transportation Task Force - Status: Ongoing.
5. Review air quality, noise and mass transit implications of several downtown parking improvement strategies - Completion Date: Winter '85.

6. Undertake neighborhood transportation planning studies - examine existing conditions, assess problems areas - Completion Date: December '85.
7. Work with pertinent agencies regarding Third Harbor Tunnel/Central Artery - Status: Ongoing.
8. Review roadway and development proposals in light of traffic and parking impacts including Chelsea-Water Connector, Northern Avenue/Haul Road, Northern Avenue Bridge, Rowes Wharf, Harbor Point, Fan Piers, etc. - Status: Ongoing.
9. Developed Boston-based sightseeing bus drop-off/pick-up and layover policy - Completion Date: March '85.
10. Developing policy for drop-off/pick-up and layover for commuter buses at South Station in cooperation with MBTA - Completion Date: Fall '85.
11. Development of a transfer area from water transportation to land transportation on Surface Artery - Completion Date: Winter '85.
12. Coordinate taxi-stand locations to minimize traffic disruption - Status: Ongoing.
13. Monitor truck routes downtown to reduce noise and safety problems - Status: Ongoing.

Boston Water and Sewer Commission (BWSC)

ADDRESS

Boston Water and Sewer Commission
10 Post Office Square
Boston, MA 02109

CONTACT PERSON(S)/PHONE NO.

Francis W. Gens, Executive Director
Charles Button, Chief Engineer
(617) 426-6046

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Plans, designs, constructs, operates, and maintains water distribution and waste-water collection systems within Boston.
- o Sells water and wastewater services to persons, public and private corporations, municipalities, and state and federal government.
- o Issues joint MDC-BWSC industrial waste discharge permits.
- o Issues water and sewer connection permits.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

1. Sewer Improvement Program

The BWSC is in the third year of a \$60 million design and construction program to replace major sewer interceptor pipes. The program is part of the Commission's effort to improve water quality in Boston Harbor. Construction of the New East Side and New Boston Main Interceptors began in 1982 and is anticipated to run through 1989. The new interceptors will extend from the Columbus Park Headworks in South Boston to Atlantic Avenue near Rows/Fosters Wharves. More than one million residents and commuters will be served by the new system.

2. Capital Improvement Program

The BWSC is required by Chapter 436 of the Acts of 1977 and its Revenue Bond Resolution to submit each year a proposed capital improvement program for the three succeeding fiscal years. The Capital Improvement Program for the water distribution and waste water collection systems for fiscal years 1985, 1986, and 1987 include several areas within the Harborpark project boundaries.

Warren Dillon, Director
(617) 727-3210

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

The Massachusetts Department of Commerce is a subsidiary office of the Executive Office of Manpower and Economic Affairs. It has no formal regulatory or permitting responsibilities.

In conjunction with Boston EDIC and the Greater Boston Visitor and Convention Bureau, Inc., the Department promotes and features Boston as a location for:

- o industrial locations
- o commercial activity
- o tourism, conventions, seminars, harbor islands tours, and related visitor activities, etc. -

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

- o As a state agency, the Department of Commerce works with the Department of Environmental Management and the Metropolitan District Commission to promote the use and enjoyment of the Harbor Islands State Park; and with the EDIC to identify potential tenants and industrial users for the Marine Industrial Park, and the former Boston Army Base. Similarly, the Department of Commerce cooperates with private owners and developers in seeking tenants for private industrial areas such as the former Schrafft's facility, and Revere Sugar, etc.

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Responsible for assuring that proposed development plans comply with urban renewal plans when they exist. Within the Harborpark area, there are urban renewal plans for the Charlestown waterfront and a portion of the Inner Harbor.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

- o Involved with the revitalization of Columbia Point in Dorchester through various types of financial support.
- o Because of the agency's urban renewal powers, involved with current revitalization efforts in the North Station area.

AGENCY

Energy Facilities Siting Council

ADDRESS

Energy Facilities Siting Council
Commonwealth of Massachusetts
Saltonstall Building, Room 2109
100 Cambridge Street
Boston, MA 02202

CONTACT PERSON(S)/PHONE NO.

James G. White, Jr., General Counsel
(617) 727-1136

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

The Energy Facilities Siting Council is an independent administrative agency of the Commonwealth empowered to ensure a necessary energy supply at a minimum impact on the environment at the lowest possible cost. (Mass. Gen. Laws Ann. Ch. 164, Sec. 69H) The Siting Council is composed of ten members and is chaired by Sharon M. Pollard, the Secretary of Energy Resources. The other members include the Secretaries of Environmental Affairs, Consumer Affairs, and Economic Affairs, and six members publicly appointed by the Governor.

The Siting Council must approve certain types of energy "facilities" above minimum threshold sizes prior to construction. The facilities include: (1) electric generating units over 100 megawatts; (2) electric transmission lines with a design rating of 69KV or greater and a mile or more in length, and ancillary structures; (3) gas storage or manufacturing facilities; (4) gas pipelines with an operating pressure over 100 psig and a mile or more in length; and (5) certain oil storage or pipeline facilities.

The Siting Council's approval is required prior to construction of those projects defined as "facilities" in the enabling legislation. The applicant company still must obtain all other necessary state and local permits. The Siting Council can override the failure by another (state or local) agency to issue a necessary permit. Since the Council's inception, no application for an override has ever been filed with the Siting Council.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

The Siting Council is a responsive agency in that it reviews applications by energy companies to construct facilities. The Siting Council does not propose any projects of its own.

The two companies with the greatest likelihood of engaging in the construction of energy "facilities" in the Harborpark Area are Boston Gas Company and Boston Edison Company. These two companies should be contacted directly concerning their plans for construction in the Harborpark area.

Boston Gas Company and Boston Edison Company, however, make annual filings with the Siting Council which list existing and proposed facilities.

Boston Edison is planning to construct a 345 KV underground transmission line from its Mystic Station 250 in Everett to the vicinity of Lincoln, Essex, and Kingston Streets in downtown Boston. Excerpts from Boston Edison's March 1, 1985, filing (including a description of the two alternative routes for this transmission) are available.

Boston Edison's 1985 Siting Council filing also lists two anticipated future 115 KV transmission line projects in the City of Boston: a "Metropolitan Boston Area Supply" line (in service 1992) and a line from Congress Street to Chatham Street (in service 1989). The Company should be contacted for further specific details.

In 1984, Boston Gas Company applied for and received the Siting Council's approval (and the approval of other state and local agencies) to construct an underground high pressure gas pipeline from the Company's LNG storage terminals off the Southeast Expressway in Dorchester to Boston Edison's New Boston generating station in South Boston. The purpose of the pipeline was to allow Boston Edison to burn natural gas during the process of conversion of the generating plants from oil to coal as a generating fuel. The route of the pipeline is described in the Siting Council's decision.

AGENCY

Executive Office of Environmental Affairs (EOEA).

ADDRESS

Executive Office of Environmental Affairs
Commonwealth of Massachusetts
100 Cambridge Street
Boston, MA 02202

CONTACT PERSON(S)/PHONE NO.

James Hoyte, Secretary of EOEA and Member of the Harborpark
Advisory Committee
(617) 727- 9800

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

The Executive Office of Environmental Affairs is a cabinet-level agency with the principal authority to implement and oversee the state policies aimed at preserving, protecting, and regulating the natural resources and the environmental integrity of the Commonwealth of Massachusetts.

Within the Executive Office are three operating units which report directly to the Secretary:

1. Division of Conservation Services (CS)

The Division of Conservation Services assists regional conservation districts and municipal conservation, park, and recreation commissions in their efforts to acquire and preserve open space, conservation and recreation areas. The Division of Conservation Services administers three programs - the Federal Land and Water Conservation Program, the State Self-Help Program, and the State Urban Self-Help Program - which provide for partial reimbursement to the State and its political subdivisions for the purchase and development of recreation lands.

2. Massachusetts Environmental Policy Act and Review (MEPA)

The Massachusetts Environmental Policy Act (MEPA) program is an interdisciplinary program which examines environmental impacts of state actions (including permitting, approvals, and funding).

3. Massachusetts Coastal Zone Management Office (CZM)

The Massachusetts Coastal Zone Management Office developed and now implements state policy concerning the protection, development and revitalization of the resources of the Massachusetts coastal zone. The CZM office has three major program objectives:

- o Policy and Planning: identify and evaluate significant policy issues affecting the coastal zone including coastal hazards, public access, water quality, wetlands management, critical areas, ocean dumping and waterfront revitalization.
- o Community Assistance: provide professional staff assistance to coastal communities and state and federal agencies concerning policy issues and regulatory standards for projects affecting the coastal zone. Assist municipalities with the implementation of past CZM community grants.
- o Federal Consistency Review: review all federal activities that affect the Massachusetts coastal zone to determine whether such activities are consistent with the state's coastal policies. This includes the review of all OCS oil and gas exploration and development activities on Georges Bank.

There are also five departments which make up the Executive Office of Environmental Affairs:

- o Department of Environmental Management (DEM)
- o Department of Environmental Quality Engineering (DEQE)
- o Department of Fisheries, Wildlife, and Recreational Vehicles (FW&RV)
- o Department of Food and Agriculture (DFA)
- o Department of Metropolitan District Commission (MDC)

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

The Massachusetts Coastal Zone Management Office developed and now implements state policy concerning the protection, development and revitalization of the resources of the Massachusetts coastal zone. The CZM office has three major program objectives:

- o Policy and Planning: To identify and evaluate significant policy issues affecting the coastal zone including coastal hazards, public access, water quality, wetlands management, critical areas, ocean dumping and water-front revitalization.
- o Community Assistance: To provide professional staff assistance to coastal communities and state and federal agencies concerning policy issues and regulatory standards for projects affecting the coastal zone. Assist municipalities with the implementation of past CZM community grants and currently award CFIP grants.
- o Federal Consistency Review: To review all federal activities that affect the Massachusetts coastal zone to determine whether such activities are consistent with the state's coastal policies. This includes the review of all OCS oil and gas exploration and development activities on Georges Bank.
- o Ch. 91 Tidelands Licensing Activities:

Columbia Point
Schrafft's
Lewis Wharf
Fort Point Channel

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

1. Coastal Facilities Improvement Program

Charlestown Navy Yard/Shipyard Park - \$560,439

This project involves creating 1/3 mile of pedestrian public walkway as a promenade around drydock #2 adjacent to the National Park site. It is the last phase of a \$2.9 million construction program for a 16-acre passive recreation park within the Charlestown Navy Yard for the community of Boston. The park and developments are part of a total rehabilitation effort for the Charlestown Navy Yard, and when completed, almost 1/3 mile of harborfront public pedestrian access will be created.

Dry Dock Park - \$51,300

This project involves constructing a fence between the site where a cement plant now under construction will operate, and a passive recreation park which the EDIC of Boston and Coastal Cement, Inc., plan to develop on Drydock #3. The EDIC and Coastal Cement, Inc., are working jointly to improve the total area of the drydock part of which they will share. EDIC's park would create access and open new visual vistas to the water's edge, and the fence project would provide safety and security.

AGENCY

Division of Conservation Services (Executive Office of Environmental Affairs)

Boston, MA 02202

CONTACT PERSON(S)/PHONE NO.

Joel A. Lerner, Director
(617) 727-1552

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Administers the Federal Land and Water Conservation funds (L&WCF).
- o Administers the State Urban Self Help Program.
- o Administers the State Self-Help Program.
- o Assists regional conservation districts and municipal conservation, park, and recreation commissions in their efforts to acquire and preserve open space, conservation, and recreation areas.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

- o Long Wharf L&WCF Project #25-00295 - Long Wharf reconstruction includes seawall reconstruction, wood pilings, perimeter wood decking, walkways and creation of a passive park. Completion date is 5/15/86. Currently the project is 39% complete.
- o Columbia Point Conversion, Project #25-00148 - Constructed in 1975-76, the project consists of a street hockey area, 2 tennis courts, 2 basketball courts, floodlights, drainage, irrigation and ballfields. Since new housing is proposed for Columbia Point which will convert the L&WCF area to other than recreational use, a suitable replacement must be provided. The replacement parcel must be of equal value and utility.

(617) 292-5500
Gary Clayton, Director - DWWR
(617) 292-5695

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

1. Wetlands Protection Program

- o Under M.G.L. Chapter 131 section 40 (the Wetlands Protection Act) a project to remove, fill, dredge or alter any area subject to the Act (within the Harborpark Area this would include land under or bordering on the ocean and land subject to tidal action, coastal storm flowage or flooding) requires a filing of a notice of intent with the Boston Conservation Commission and a copy to DEQE.
- o The Conservation Commission issues orders of conditions and, on appeal, the Department issues superseding orders. A second round of administrative appeal is provided by the Department through adjudicatory hearings and final orders.

2. Tidelands Program

- o The Division reviews all notices of intent to determine if projects are also subject to Chapter 91 licenses or permits.
- o All subject projects are reviewed for:
 - the public rights of fishing, fowling and navigation
 - structural integrity
 - consistency with CZM policies
 - protection of natural resources
 - water dependency
 - proper public purpose

- o A license is issued, upon payment of any applicable fee, describing how the project shall be constructed.
- o A certificate of compliance is issued on application when the project is completed.

Massachusetts Bay Transportation Authority
10 Park Plaza
Boston, MA 02116

CONTACT PERSON(S)/PHONE NO.

James O'Leary, General Manager
Virginia N. Scharfenberg, Development Staff Assistant for Community Liaison
(617) 722-5326

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Provides subsidy for water transportation during expressway construction work.
- o Provides regional public transit system (subway, bus, commuter rail) for the Boston metropolitan area.
- o Conduit for federal MBTA operating funds.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

1. Old Colony Railroad Rehabilitation Project

In response to a legislative mandate, the MBTA conducted the Old Colony Feasibility Study and submitted it to the Legislature in June, 1984. Both commuter rail and bus alternatives between South Station, Middleboro, Plymouth and Scituate were considered. With the feasibility of rail restoration established in the report and with elected officials and Southeastern Massachusetts communities requesting solutions of their public transportation problems, the Governor has backed the continued process of working toward rehabilitation of the rail service on the Old Colony Lines.

Preparation of the necessary environmental work was begun in June, 1985 and will be completed in about one year.

Restoration of service on the Old Colony Lines would require a new railroad bridge over the Neponset River.

2. Commuter Boats

The Executive Office of Transportation & Construction coordinates the land-based elements of the Commuter Boat program (ramps, piers, floats), while the MBTA administers the water-based aspects.

The MBTA's contract with the Department of Public Works to handle schedules and subsidies for high speed commuter boats running between Hingham and Boston will expire on January 31, 1986. Service will be extended for another three years, pending available funding.

3. North Station Transportation Improvement Project

In the summer of 1980 a study was undertaken to examine the alternatives for relocating the Green Line at North Station. In February, 1985 the MBTA Board of Directors approved the subway option. Plans include an adjoining Orange/Green Line station just south of Causeway Street with an underground connection to the North Station commuter rail terminal and Boston Garden. The elevated structure will be taken down upon completion of the new subway station.

In addition, the Commuter Rail platforms will be extended to accommodate longer trains and easy transfer to the Orange/Green Line station. Extensive improvements will be made to the Commuter Rail tracks and signals north of the Charles River. Further design and construction is contingent on available funding.

The Project also includes a Wateredge Pedestrian Walkway, which will eventually link MDC park areas to Science Park Station. The walkway was completed in the summer of 1985. A number of bridge piles, the result of the 1984 North Station trestle fire, remain in place and may be utilized by the MDC to develop an additional walkway. The MBTA is in the process of transferring ownership of the Wateredge Pedestrian Walkway and the piles to the MDC.

4. South Boston Power Plant Demolition

Alternatives for demolition of the South Boston Power Plant and accessory elements are being considered by the Authority. The power plant is located at 724 East First Street in South Boston.

5. MBTA Red Line Modernization at JFK/U.Mass. Station

Plans for station modernization at JFK/U.Mass. Station include a second platform to provide access to the station for South Shore commuters, modifications to the east side bus loop, and a new station lobby. It is anticipated that work will be completed in the fall of 1987.

Joint development possibilities at the east side bus loop site are being considered for construction of a new MBTA Police Headquarters and a garage.

6. Blue Line Vent Shaft at Long Wharf

A new Blue Line vent shaft is under construction on the north side of Long Wharf and will be completed in December, 1986. Architectural improvements being made include restabilization of the sea wall, a brick and granite plaza, and a large glass and brick shade structure. Improvements to the adjacent half of the wharf will be done by the BRA.

7. Bowdoin Charles Connector

The Red and Blue Lines are the only two in the MBTA system that do not intersect. A feasibility study for a Bowdoin-Charles Connector will be completed in April 1986.

The project calls for extending the Blue Line under Cambridge Street from Bowdoin Station, to Charles Station (Red Line). The project would provide more efficient service to Logan Airport for Red Line passengers, and to Massachusetts General Hospital for East Boston residents. Construction should begin in 1989, pending availability of funds.

8. South Station Transportation Center

Phase I construction of the South Station Transportation Center began in mid-1984. The headhouse, new west wing, new track, railroad platforms, and the foundation system for air-rights will be completed by December, 1987.

Phase II include design and construction of the MBTA's bus terminal and parking garage, scheduled to be completed in December, 1989.

In late 1986, the Authority will select a developer for leasing and management of the headhouse, which will contain approximately 80,000 square feet of office space and approximately 20,000 square feet of retail space.

The South Station Red Line modernization project, scheduled for completion in 1987, will lengthen the platforms to accommodate six-car trains. In December, 1987 a second construction package will be issued to modernize the station and provide for a direct connection to the South Station headhouse.

9. Fort Point Channel Bridge

A study to be completed for the Authority in January 1986 will present alternatives for replacement or repair of the Fort Point Channel Bridge. If the Authority chooses to replace the bridge, construction would last about two years; if it chooses to repair the bridge, construction would last about one year.

Massachusetts Historical Commission (MHC)

ADDRESS

Massachusetts Historical Commission
80 Boylston Street
Boston, MA 02116

CONTACT PERSON(S)/PHONE NO.

Valerie Talmage, Executive Director
Brona Simon, State Archaeologist
(617) 727-8470

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

The Massachusetts Historical Commission reviews the effects of state projects on historic and archaeological properties listed in the State Register of Historic Places in accordance with M.G.L. Ch. 9, ss, 26, 27c and 27c, as amended by Chapter 152 of the Acts of 1982. The Massachusetts Historical Commission must be notified by any state agency, executive office, department, board, commission, bureau, division or authority when a project that the agency funds, licenses or permits affects a property listed in the State Register. If it is determined that the project will have an adverse effect on the State Register property, the state body and MHC will consult to evaluate alternatives which would avoid, minimize or mitigate the adverse effects.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

Not applicable.

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark District)

- o Owns and maintains/develops lands, piers, and other structures and facilities on Boston's waterfront.
- o Has authority to acquire by eminent domain land, property, rights of way, etc., for construction or operation of any project with approval of Governor and Council and within the limits of authority granted by Legislature.
- o Constructs or acquires additional facilities.
- o Investigates conditions for improvement of commerce in Boston and the surrounding Metropolitan area.
- o Issues revenue bonds (not to exceed \$15 million) for acquisition and construction of trade and transportation center.
- o Undertakes studies, surveys on feasibility of facilities.
- o Controls, operates, and maintains airports.
- o Has authority to fix, revise, charge, and collect tolls, rates, fees, rentals, etc., for the use of projects.
- o Must comply with DEQE Division of Waterways Ch. 91 license for construction or dredging below mean high water mark.
- o Is subject to Wetlands Order of Condition in the City of Boston.
- o Directs maritime trade.
- o Assists in exporting activities to foreign countries.

The above powers are excerpts from the Enabling Act of the Massachusetts Port Authority. For a complete listing of all of Massport's powers, please see the Enabling Act of the Massachusetts Port Authority as described by Chapter 465 of the Acts of 1956 as amended through December 1981.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

South Boston Piers

1. Commonwealth Pier - The lease with BOSCOM PARTNERS was signed 9/25/84. Rehabilitation of the building began in the fall of 1983. It opened in late 1985 with major tenant occupancy expected in the spring of 1986. BOSCOM PARTNERS are developing a World Trade Center at Commonwealth Pier and have an option to lease several parcels on Commonwealth Flats. The World Trade Center is an 865,000 sq. ft. facility comprised of office space, a conference center, auditorium and exhibit hall oriented towards enhancing world trade. MASSPORT will retain the pier apron for harbor vessels including ferries or water taxis. The Cruise Ship Terminal will be relocated.
2. Boston Fish Pier - Completion of the renovation is targeted for 1986. The power plant has been demolished and replaced by surface parking. The first tenants moved into renovated space in Summer 1983. Third floor office space should be ready for occupancy in Winter 1985. Northern Avenue is presently being reconstructed with major streetside improvements.
3. Massport Marine Terminal - Filling of the BMIP property is complete. There will be some lighting, paving and fencing work to begin on July 1 and expected to be completed in 90 days. Repairs to the North Jetty should begin in Spring 1985 and take approximately one year to complete.
4. Boston Army Base - The Cruise Ship Terminal is being relocated to the Army Base. It is near completion.
5. Conley Terminal - The two major projects recently completed at Conley Terminal are rebuilding of part of the roadway and the construction of a new inventory shed.

Charlestown Waterfront

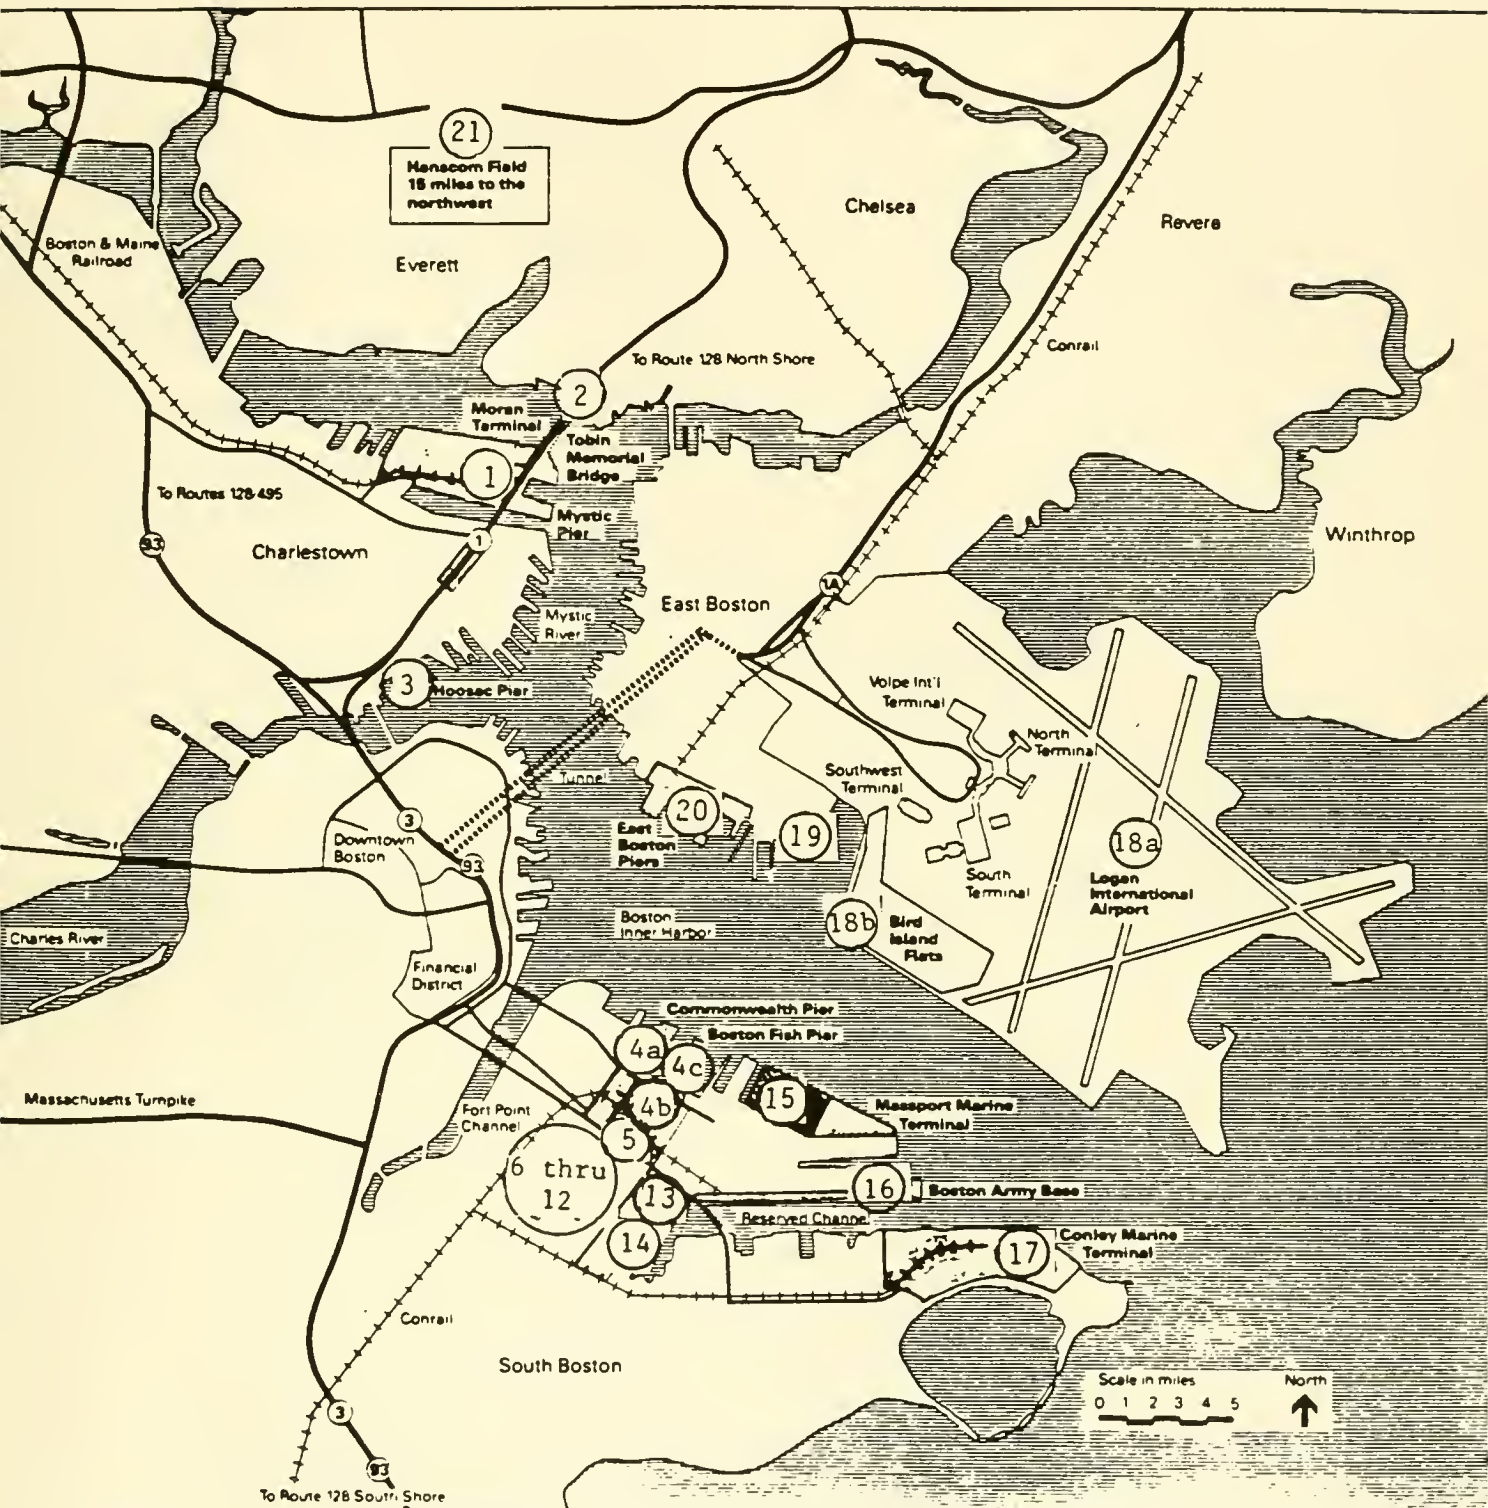

1. Moran/Mystic - In FY'86 anticipated projects will be: repairs to the wharf and foundation of Mystic Pier, resurfacing Mystic yard and repairs to Moran Dock. Construction dates are not available.
2. Hoosac Pier/Constitution Wharf - All development at Hoosac is essentially complete.

East Boston Waterfront

1. East Boston Piers - Under contract to MassPort, the Boston Redevelopment Authority is working with the Project Advisory Committee to prepare a

development plan for the Piers. Development may occur in phases with a possible first phase to include a lobster facility and public park. In the interim, land and water area at the Piers is leased on a tenant-at-will basis. MBTA is completing construction of Vent Shaft and Emergency Exit for the Blue Line on the Lewis Street edge of the property.

2. Boston Shipyard - Massport submitted the winning bid and purchased the 18.5 acre property from the Boston Shipyard Corp. on December 31, 1985. The Yard will be developed for water dependent related industrial uses for 18.5 acres owned by the Boston Shipyard Corporation.
3. Harborwalk/Logan So./Harborside - Ribbon cutting for Phase 1 of the Harborwalk took place in July, 1985. Phasing for the remainder of the project has not been scheduled.

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Took over water supply and sewage disposal responsibilities from the Metropolitan District Commission on July 1, 1985.
- o Will rebuild sewage treatment plants in Boston Harbor and repair water supply lines.
- o Will work toward halting the flow of sewage and other pollutants dumped into the Harbor.
- o Will set wholesale water and sewer rates.
- o Will be able to issue up to \$600 million in general obligation bonds to be guaranteed by the State during the agency's first five years.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

As mandated by Chapter 372 of Massachusetts General Laws, the Massachusetts Water Resources Authority took over operations of the MDC Sewer and Water Divisions on July 1, 1985. The Authority will be a principle player in a number of areas which affect the health of the harbor, including implementation of a Court-ordered schedule of projects to upgrade operations and the siting, planning and construction of a major secondary wastewater treatment facility. The capital programs of the former MDC Water and Sewerage Divisions will also fall under the jurisdiction of the MWRA.

The Board of Directors of the Authority has been meeting regularly since it was sworn in February 27, 1985.

Joseph Brown, Commanding Officer
(617) 242-5670

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Support agreement with Boston National Historic Park for 300 ft. of berthing space at Pier 1, Charlestown Navy Yard and 56,000 sq.ft. of support area in adjacent buildings.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

- o Provision of docking facilities for four boats adjacent to U.S.S. Constitution. Design completed, FY'85 purchase, completion in FY'86.
- o Improved night illumination of U.S.S. Constitution. Project initiated, design in FY'86, completion in FY'87.

AGENCY

Environmental Protection Agency (EPA)

ADDRESS

U.S. Environmental Protection Agency, Region I
J.F.K. Federal Building / Room 2103
Boston, MA 02203

CONTACT PERSON(S)/PHONE NO.

Michael Deland, Regional Administrator
Bart Hague, Chief of Environmental Studies
(617) 223-3917

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

- o Establishes permit requirements and decision-making procedures for EPA and State-administered programs.
- o Issues permits under National Pollution Discharge Elimination Systems (NPDES), Sewage Treatment Standards, Dredge or Fill Program, Hazardous Waste Management Program, Underground Injection Program, and Prevention of Significant Deterioration Program.
- o Enforces Clean Water Act PL 92-500, as well as Clear Air Act (PL91-604) and Resource Conservation and Recovery Act (RCRA) (PL94-580).
- o Awards grants for the design and construction of waste water treatment facilities, including major interceptors and combined sewer overflow correction projects (CSO).
- o Awards grants to assist the states, in cooperation with area-wide planning agencies, develop water quality management plans to meet EPA/State water quality standards.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

- o Preparation of Draft Environmental Impact Statement on Siting of Wastewater Treatment Facilities in Boston Harbor, 12-31-84, and Final Environmental Impact Statement, expected in December 1985.
- o Review of request for waiver of secondary treatment. Waiver request denied, 3-29-85.
- o Award of grants for design and construction of Combined Sewer Overflow (CSO) projects. Major projects pending or proposed:

1. Fort Point Channel CSO - Estimated cost - \$90 million. EPA share - \$50 million. Location - On Fort Point Channel on South Side of South Station Tunnel, near Boston DPW Garage. Status - Currently on hold, since its location is in direct conflict with the proposed Third Harbor Tunnel.
2. Commercial Point Screening & Disinfection Facility - Estimated cost - \$5.1 million. EPA share - \$2.8 million. Status - Grant awarded September 30, 1985. Construction would probably commence spring of 1986, with an estimated 18-month construction period.
3. Constitution Beach - Estimated cost - \$1,370,000. EPA share - \$971,000. Status - Grant awarded 9/17/84. Bids for this project opened 5/85. Started construction 10/85, and expected to complete construction 10/86.
4. Fox Point Screening & Disinfection Facility - Estimated cost - \$3.96 million. EPA share - \$2.9 million. Status - Grant awarded 9/27/84. However, delays due to moving proposed site from near Dorchester Yacht Club to opposite side of Southeast Expressway. Amended Finding of No Significant Impact (FNSI) issued 5/8/85. Will probably start construction 4/86, with completion probably 4/87.

AGENCY

National Marine Fisheries Service (NMFS)
National Oceanic & Atmospheric Administration (U.S. Dept. of Commerce)

ADDRESS

National Marine Fisheries Service, Habitat Conservation Branch
National Oceanic & Atmospheric Administration
U.S. Department of Commerce
Federal Building
14 Elm Street
Gloucester, MA 01930

CONTACT PERSON(S)/PHONE NO.

Richard H. Schaefer, Acting Regional Director
Christopher Mantzaris, Ecologist
(617) 281-3600

POWERS/RESPONSIBILITIES/PERMITS (In the Harborpark Area)

The National Marine Fisheries Service (NMFS) is mandated by various laws to manage and conserve the Nation's living marine resources. It carries out these mandates through various management programs. One of these programs is the Habitat Conservation Branch (HCB) in NMFS's Northeast Region.

HCB's mission is to prevent or minimize damage to habitats used by fish and other marine organisms for reproduction, feeding, migration, and other life processes and to encourage the protection and recovery of marine mammal and endangered species population as necessary. Under the Fish and Wildlife Coordination Act; National Environmental Policy Act; Marine Protection, Research, and Sanctuaries Act; Marine Mammal Protection Act; Endangered Species Act; and other authorities, HCB provides reviews, consultations, and recommendations to federal agencies and states for use in making regulatory and planning decisions. Associated activities are: review, evaluation, and comment on project plans submitted by federal agencies; response to applications for permits to work in navigable waters; comments on environmental impact statements; involvements with outer continental shelf oil and gas developments; participation on coastal zone management planning activities; involvement with pollution discharge permitting; and serving on technical and advisory committees. A complementary goal is to allow needed development while preventing unnecessary damage to living marine resources. The following guidelines are used when reviewing water development projects:

1. Alternatives: Project modification or alternative design can often minimize impacts to aquatic resources without significantly altering the purpose or function of the original proposal. Alternative sites are also investigated, if modifications cannot adequately ameliorate impacts at the proposed location. The "no project" alternative may be recommended when the degree of project impact is determined to be unacceptable and cannot be sufficiently mitigated through modification.

2. Water Dependency: Projects that require being located in or adjacent to the water, such as marinas and port facilities, are considered water-dependent, and consequently an appropriate, albeit competitive, use of the aquatic environment. Certain activities associated with these project types, such as boat or cargo storage, may be water-related, but not water dependent, and may not be considered appropriate uses.
3. Public Interest: A project may affect various public resources, other than fisheries or associated habitat, either positively or negatively. Long-term economic benefits to the community, such as increased employment, establishment of public water access for recreational opportunities, and factors influencing the public health and safety are among the most commonly considered aspects of public interest.

Should it be found that a water-dependent project is in the public interest and without feasible alternative, it is generally recommended that compensation be required to offset the loss or degradation of aquatic habitat. Compensation is tailored to the particular site and project, and may consist of: replacement in-kind (e.g., conversion of uplands to marsh or shallow water); restoration of existing habitat that has been degraded; or enhancement of habitat to improve its biological productivity.

CURRENT PROJECTS IN THE HARBORPARK AREA (Description, Status, Completion Date)

National Marine Fisheries Service has no projects planned or underway in the Harborpark area.
